Investigative Report

The following details have been uncovered in the on-going investigation of the death of Grimsby Graves.

- ◆ Graves died of a fractured skull. The coroner speculates the fracture occurred when Graves fell or was pushed into the open grave of Hadrian Corpus.
- ◆ The time of death is estimated to be between 10:15pm and 10:45pm.
- ◆ A small cut was found on the front of the neck of the corpse.
- ◆ An as-yet unidentified sleep-inducing chemical was found in the deceased's bloodstream.
- ◆ A shovel was found imbedded in a small mound of dirt near the grave. We've been unable to obtain any fingerprints from it.
- ◆ Two sets of footprints were in the loose dirt near the open grave. One set matched the shoes worn by Graves. The second set is yet to be identified, but leads in the direction of Lantern's Pumpkin Farm.
